Pop Tab Program

The little, seemingly insignificant tab you pull to open your aluminum cans helps the Ronald McDonald House provide a safe and comfortable place they can call "home" while their children recover in nearby hospitals.

The Pop Tab program is an environmentally smart, community friendly program which focuses on separating the pull tab from aluminum beverage cans. The tab is a higher grade aluminum than the can, resulting in a higher dollar return per pound than cans. The pop tabs are recycled and the proceeds go directly to families in need who are staying at the House.

Anyone and everyone can collect pop tabs! It's easy, fun, and a great project for schools and community groups.
